## Autour du Petit Paradis

A 17th century house of character with its listed façade and staircase dating from the same period.

The house has been completely renovated, combining the spirit of the period with contemporary comfort and ecological solutions. In keeping with this peaceful and green setting right in the city center, our apartments of different sizes, have been tastefully equipped. A small piece of paradise blotted one minute walk from the covered market “Les Halles” and the pedestrian streets right in the heart of the walled city.

Throughout the year Sabine, Patrick and their three daughters welcome you in their two totally renovated guesthouses.
